

When Tobacco manufacturers need a **coding solution...**

...they count on us

Scan the code to see Domino's quality coding solutions for the Tobacco industry

Domino. Do more.

# Leading global provider to the Tobacco industry

- ◆ Domino offers total solutions for Pack to Case coding, with easy to use, highly reliable coders and bespoke application parts, to ensure a seamless integration and ongoing efficiency
- ◆ Our focused approach to the specific requirements of the industry has resulted in Domino becoming the strategic coding supplier to the world's largest Tobacco producers and Original Equipment Manufacturers
- ◆ Domino coding technology is designed to enable manufacturers to comply with legislative requirements such as EU TPD2, UAE, Russia & those that will be driven by the WHO FCTC Anti-Illicit Trade protocols.
- ◆ Domino is industry recognised for pre and post sales support for ensuring both the right solutions for your applications and that you achieve maximum line productivity

## Connectivity

Domino products are fully compatible with the most commonly Globally deployed track & trace software solutions.

*“Domino recognises illicit trade as a serious global issue for the Tobacco industry. We endeavour to protect the integrity of genuine companies operating in the sector by consciously avoiding any dealings with illicit operators in this, or any other industry”*

**Domino. Do more.**

# Service and Aftermarket

Domino is dedicated to the long term efficiency of customer production environments and delivers coding and marking equipment peace of mind through the following:

## Global Sales and Support

- ◆ Extensive network globally ensuring effective integration and operator training combined with fastest ongoing support in over 120 countries.

## Service and Warranty Agreements

- ◆ Ensuring predictability of lifetime costs via widest range of globally consistent service, support and warranty agreements tailored to your needs.

## Consumables

- ◆ Fully comprehensive range of consumables to ensure optimum performance at customer site and 24 hour online ordering of consumables via [www.buydomino.com](http://www.buydomino.com)

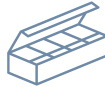

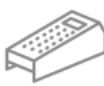

## Training

- ◆ Commitment to start-up and ongoing training available locally, online or Head Office based at Domino's Training Academy.

# Coding and marking solutions

From pack and pouch to carton and case, Domino has the technology

	 Pack (soft)	 Pack (hard)	 Pouch	 Tin	 Carton	 Case	 Bundle
 Continuous Ink Jet	✓	✓	✓	✓	✓		
 Laser	✓	✓	✓	✓	✓		
 Thermal Ink Jet	✓	✓	✓		✓	✓	
 Thermal Transfer Overprinting			✓				
 Print and Apply Labelling				✓	✓	✓	✓
 Outer Case Coding						✓	

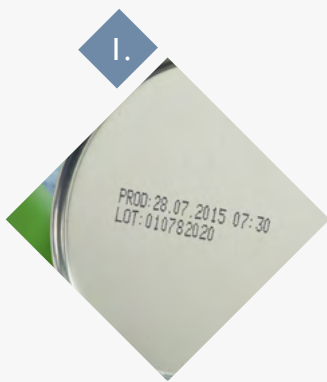

# for the Tobacco industry

to suit your environment.

## Coding Solutions

Domino provides the largest range of innovative solutions for secondary manufacturing, offering the flexibility to

### Continuous ink jet Ax-Series

- ◆ Widest range of inks and substrate suitability
- ◆ High speed coding up to 1,000 packs per minute
- ◆ Small print head for easy integration into all packers and cartoners
- ◆ Simple to operate, reliable and cost effective coding management

### Laser D-Series

- ◆ High contrast and high quality codes through smaller performance spot
- ◆ Complex serial codes produced on the fly and at high-speeds with Dynamark software
- ◆ The **i-Tech** scan head and optimised cooling ensures high performance in any production environment

### Thermal ink jet G-Series

- ◆ Ideally suited to high-speed serialisation or printing intricate codes
- ◆ Certified industry leading inks for light fastness and contrast to ensure fewer rejects
- ◆ Seamless integration into complex packaging lines with Domino OEM Board

## Application Parts

Domino's bespoke parts are designed for a range of packer types - ensuring a smooth, high quality Tobacco installation and a more efficient line.

### The parts are intended for applications such as:

- ◆ Single or twin coding installations
- ◆ Pack stabilisation in drum pockets
- ◆ Support stands and brackets
- ◆ Drying belt shrouds and guards
- ◆ Interface boxes
- ◆ Encoder brackets
- ◆ Cigarette Pack Coding Station

To learn more about Domino's range of Application Parts please contact [tobacco@domino-printing.com](mailto:tobacco@domino-printing.com)

meet all your coding needs.

#### Thermal transfer overprinting V-Series

- ◆ Ideal for most flexible packaging applications such as pouches and overwrapped bundles
- ◆ The **i-Tech** Ribbon Drive reduces ribbon use by up to 60%, decreasing Total Cost of Ownership
- ◆ Quick and simple changeover process with new ergonomic cassette

#### Print & apply labelling M-Series

- ◆ Best solution for applying labels onto bundles, cases and pallets at any line speed
- ◆ Avoid label damage in the event of an emergency stop with innovative 'no drop' function
- ◆ Pallet labeller with 3-sided labelling capability and multiple label sizes

#### Outer case coding C-Series

- ◆ Delivering high resolution large text, graphics and barcodes
- ◆ Range of water and solvent based inks for printing on porous and non-porous materials
- ◆ Exceptional reliability and uptime even in harsh environments

## Vision Control System

To automatically check codes on line, Domino has developed a range of Vision Control Systems in close co-operation with leading camera suppliers such as Cognex & Omron.

- ◆ Highly intuitive, easy to set-up & use
- ◆ Can control reject systems
- ◆ Range of lighting & bracketry to suit specific production lines
